

About Carney Plumbing, Heating and Cooling:

Carney is residential and commercial services provider, specializing in plumbing, heating, air conditioning, as well as Geothermal, whole home generators, water treatment and indoor air quality.

Founded in 1976 by Kevin J. Carney. Located in Hatfield, Pennsylvania and employs approximately 38 individuals. The core of the Company's success over the years has been the Individuals that comprise it. Team Work, dedication to our customers and a close-knit culture have enabled the Company to grow and thrive through the years.

Due to continued rapid growth, we are looking to add a self-motivated individual to our team who has the capability to install and replace residential heating and cooling as well as indoor air quality products.

About the Opportunity:

Maintain and repair heating and air conditioning equipment in commercial and residential settings.

Maintain and promote the use of indoor air quality products to customers, as well as yearly maintenance agreements.

Assist in the training and development of current apprentices.

Qualification:

Candidate should have at least 3 years' experience in a service technician role.

Candidate should possess general understanding of duct systems as well as air flow.

Candidate should be EPA certified for refrigeration handling.

Candidate should be friendly, outgoing, drug free, punctual, have willingness to learn, possess a valid driver's license, maintain a neat appearance and have a clean criminal record.

N.A.T.E. Certification is a "Plus".
